## **DETAILED ACTION**

### ***Papers Received***

Receipt is acknowledged of the applicant's amendment and response, both received on 14 June 2004.

### ***Claim Rejections - 35 USC § 103***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

The rejection of Claims 1-23 under 35 U.S.C. 103(a) as being unpatentable over the combined disclosures of Runge *et al.* and Woerwag *et al.* is maintained.

### ***Response to Arguments***

Applicant's arguments filed 14 June 2004 have been fully considered but they are not persuasive.

In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

Furthermore, the applicant cannot hold the prior art references in the rejection made under 35 U.S.C. 103 to the same standard for a reference for which a rejection under 35 U.S.C. 102 would be made. Under 35 U.S.C. 103(a), it is not necessary for each and every single

Art Unit: 1615

limitation in the claims to be met, so long as the general conditions are met within the disclosure of the prior art.

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., the nature of skin damage) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993). In this case, there is no further limitation in the claims that recites that the skin damage must be permanent, despite the applicant's arguments. The skin conditions recited in the instant claims are characterized under the broad terms of "skin aging" and skin damage". Absent a more precise definition of the skin conditions to be treated by the instantly claimed compositions and methods, it is the position of the examiner that the collective disclosure of the prior art broadly and fairly reads on the instantly claimed invention.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 1615

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
